28. (Currently Amended) A method for exercising the upper torso of an infant utilizing a cushion which includes a supportive core element, a soft resilient material surrounding a substantial portion of said core element, said soft resilient material forming a curved outer surface for the cushion comprising the steps of:

placing the cushion on a substantially flat surface in direct contact with the flat surface,

placing the front mid-section of the infant on said curved outer surface of said cushion,

permitting the infant's hands to contact the flat surface, and

permitting the infant to roll the cushion thereby exercising his upper torso.
